

## McFarland Unified School District

The McFarland Unified School District is re-bidding the E-rate internal connections projects from the last two years. Instead of preparing new packages the adjustments are entered here. A prequalification questionnaire is required for bidding on the project. It is available at the website: <http://mcfarlandusd.com/District/Department/964-Facilities/151399-Untitled.html> The original bid documents are correct with the adjustments included below:

ER13-004 is removed as servers and software are no longer eligible.

The Dates are changed to reflect the following: there is not a mandatory job walk for the project. The Bid close will be February 20<sup>th</sup> at 10:30 am.

The acceptable models for the networking will include the option of substituting the Meraki Mx400 for the firewall, the MR26 or MR32 for the wireless, the MS420-24 for the core switch and the MS320-48 for the other switches or using the cisco equipment originally specified or an equivalent product.
